EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Vincent J. Roccia (Reg. No. 43,887) on 3/16/2005.

The application has been amended as follows:

IN THE CLAIMS

In claim 20, line 3, "a" is deleted.

The following is an examiner's statement of reasons for allowance:

Claims 1-20 are allowable over the prior art for at least the reason that even though the prior art discloses communication systems wherein high-frequency data signals propagate over power transmission lines, with conductive coupling used to uncouple and couple the data signals from and to the power lines, the prior art fails to teach or reasonably suggest, regarding claims 1-10, a method for transmitting and receiving high-frequency data signals over power transmission lines comprising the step of coupling and uncoupling the high-frequency electrical data signals to a first end of a fiber optic cable, wherein the fiber optic cable is configured to isolate power transmission line voltages that may be conducted to the fiber optic cable, and regarding claims

Art Unit: 2872

11-20, a device for transmitting and receiving high-frequency data signals over power transmission lines, comprising a fiber optic cable connected to the light transducer, wherein the fiber optic cable is configured to isolate power transmission line voltages that may be conducted to the fiber optic cable, as set forth by the claimed combination.

The optical isolator recited in Cern is an electronic device for noise isolation, whereas Summerhayes is concerned with transmitting locally generated sensor reading data from points along the power line to corresponding monitoring stations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Leo Boutsikaris whose telephone number is 571-272-2308.
